

Meadowlands Xanadu

The Ultimate in Entertainment Experience

With a target completion date at the end of 2008, the 4.8 million-square-foot Meadowlands Xanadu in Northern New Jersey, “will offer visitors of all ages a broad array of engaging experiences.” From interactive entertainment to world-class shopping to America’s first indoor skiing Snow Dome, this massive complex offers a variety of roofing challenges. Chris Anderson Roofing Company of Perth Amboy New Jersey was faced with 7,000 squares of Carlisle membrane and insulation to mechanically attach and was looking for the most productive way to get it done. By using the OMG AccuTrac

tool with Carlisle AccuTrac Fasteners and Plates, they were able to. “The AccuTrac tool helps us save on labor costs. You

have less people doing the same amount of work in less time,” according to Chris Anderson Roofing project manager Brian Wingate. “The workers are less fatigued because they do not have to constantly bend-over all day.”

The crew from Chris Anderson Roofing Company saves time and effort using the OMG AccuTrac tool.

As with any new construction project, working in concert with other trades can offer its own set of challenges. Because Chris Anderson Roofing Company was working at an incredibly fast pace, they were constantly faced with waiting for other trades to complete their work before they buttoned-up certain sections. Keeping the completed areas dry overnight was addressed by using the OMG NightShot night sealer. “The NightShot

allowed us to keep roofing without having to wait for other trades,” noted Wingate, “it was easy and fast to dispense.”

As if roofing horizontally wasn't challenging enough, attaching roof insulation to a thirty-foot high vertical walls into 18 gauge steel studs was also Chris Anderson Roofing Company's responsibility. Using Carlisle's HeadLok Drill Point Fastener (as manufactured by OMG) and scaffolding the roofing contractor easily installed the fasteners. "The HeadLok Drill Point Fastener was the only fastener that went in with ease," said Wingate.
