### **OMG Roofing Products Adds to PipeGuard Line with TallSmall -- Ideal for supporting small pipes and conduit six inches off the roof surface --**

**AGAWAM, Mass., October, 2008** – OMG Roofing Products has added another option to its growing family of OlyFlow PipeGuard supports. The new TallSmall PipeGuard is designed to support smaller diameter piping and conduit a full six inches off the roof surface.

The TallSmall unit is made from heavy-duty EPDM rubber and can accommodate steel, copper and PVC piping, electrical conduit and gas lines ranging from ¾- to two-inches in diameter.

“OlyFlow PipeGuard is a safe alternative to traditional pressure treated wood blocks that can rot, splinter and damage the roofing system,” said Dan Genovese, product manager for OMG. “In addition, the simple design is easy to use and install.”

OMG PipeGuard does not require any special tools, slip-sheets or clamps. Installation is fast and simple: just squeeze the base of the unit together to widen the pipe clamp and install over the pipe or conduit. Additionally, the 100% rubber PipeGuard unit will not deteriorate from water or sunlight exposure so there’s nothing to break down or damage the roofing system.

(more)

TallSmall PipeGuard units are packaged 10 to the box and immediately available through OMG's extensive commercial roofing distribution network. Field support is provided by OMG sales and technical team, along with nationwide, toll-free telephone support.
