AccuSeam

FASTENING SYSTEM

Membrane Attachment

Made Easy

NO-BEND ZONE

The AccuSeam system from OMG Roofing Products is a more productive and healthier alternative for mechanically attaching thermoplastic roofing membranes. The system includes an easy-to-use, automated tool, specialty plates and a choice of high performance fasteners.

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

The stand up AccuSeam tool is lightweight, maneuverable and easy to use and handle. In one motion, AccuSeam aligns the EyeHook® plate as the operator drives the fastener, doing the work of two and saving valuable time and resources.

Since each fastener is properly aligned perpendicular to the surface of the roof, you get maximum thread engagement and pullout resistance, providing a better quality installation.

Overdriving or underdriving seam fasteners may be detrimental to the integrity of the welded seam. Just set the AccuSeam tool to the proper fastener depth for consistent fastening.

MORE PRODUCTIVE AND HEALTHIER, TOO

In addition, AccuSeam is healthier for your crew. According to labor statistics, work-related stress injuries are common among workers such as roofers who handle tools, materials and heavy equipment every day.

Repetitive bending, kneeling, reaching and twisting can contribute to soft tissue injuries, called musculoskeletal disorders (MSDs). These injuries to muscles, nerves, tendons, joints and other soft tissue are especially common among roofers, and can result in life-long debilitating damage. Moreover, MSDs are costly in terms of lost productivity, increased insurance claims, higher health care costs and lost time.

The traditional method for mechanically attaching roof membrane requires roofers to work in awkward, bent-over or kneeling positions. This frequently occurs all day, in extreme heat or cold, often for many days at a time, exactly the scenario that can lead to MSDs.

The stand-up AccuSeam tool is ergonomically correct,* so roofers don't have to continually bend over, twist or kneel. And that means your crews can be more productive and at less risk of contracting MSDs.

*Ergonomic Technologies Corporation suggests roofing contractors use "screw guns that allow workers to stand while working." From 'Ergonomic Solutions for Roofing Tasks' Published by CNA 2005

COMPARE THE LABOR STEPS

When compared to traditional installation methods, there are fewer steps with AccuSeam. Plus, with the built-in measuring tail, you spend less time adjusting for missed flutes. AccuSeam can help you get ahead of schedule and enable you to redistribute job-site labor to handle time-consuming detail work or other tasks.

METHOD	STEPS			
LOOSE PLATES	ROLL OUT MEMBRANE	PLACE PLATE	PLACE SCREW	DRIVE SCREW
ASSEMBLED PLATES	ROLL OUT MEMBRANE	PLACE ASAP	DRIVE ASAP	
ACCUSEAM SYSTEM	ROLL OUT MEMBRANE	INSTALL SCREW & PLATE		

TIME

The AccuSeam system is approved by, and available through, most roofing system manufacturers.

On-site training maximizes AccuSeam productivity. OMG Roofing Products has field reps available throughout the United States for product training and job starts.

AccuSeam
FASTENING SYSTEM

VERSATILE

AccuSeam has a built-in measuring tail for accurate 6- or 12-inch on center fastener spacing. In addition, wheel extensions are removable so fasteners can be installed close to parapet walls and curbs.

AccuSeam works with OMG-made 2 3/8-inch EyeHook plates – available pre-stacked through most roof system manufacturers – and with #14 heavy duty and #15 extra heavy duty fasteners in lengths up to six inches on steel and wood decks.

ACCUSEAM BOOTS NOW SOLD SEPARATELY

For even greater functionality, the AccuSeam and AccuTrac® boots are interchangeable. Use the AccuTrac boot to install insulation to steel or wood decks, then simply attach the AccuSeam boot and attach the membrane! It's fast and easy. AccuSeam boots are available wherever AccuTrac and AccuSeam tools are sold.

For additional information or to schedule an on-site AccuSeam demonstration, please call 800-633-3800.

Plate stacker holds 100 plates for maximum productivity

1 Drive System
+ 2 Boots
= Better Functionality

Interchangeable drive system works on both AccuSeam & AccuTrac

Removable wheel extension for walls and curbs

AccuSeam AccuTrac

Measuring tail for accurate 6" or 12" o.c. spacing
