The OMG advantage

When it comes to supplying the low-slope roofing industry with products and services that improve productivity and enhance roof system performance, no one offers more than **OMG Roofing Products**.

OMG brings you the broadest product line in the industry: from the widest selection of specialty fasteners, to insulation adhesives, pipe supports, retrofit roof drains and productivity tools.

We help you by having enough "feet on the street" to back every product we sell, and to be there when you need us to help find the best fastening solution for your project.

Because our field specialists are not independent representatives, there's no hidden agenda or other system to sell. Whether you need a pull-test, job start or extra training for your crew, we're there to help.

For the latest fastening solutions and productivity tools, contact your local OMG field specialist or visit www.olyfast.com.

Look for the Ergonomic Excellence symbol on many OMG products.

drains

& flashings

*Strong, durable OlyFlow drains –
so easy to install, you won't need a subcontractor!*

Hercules® RetroDrain® is the industry's most popular retrofit roof drain. It features a one-piece spun aluminum body, heavy duty cast aluminum strainer dome and clamping ring for extra strength and durability. U-Flow Seal technology provides a watertight mechanical connection to PVC or cast iron pipes. Available in 3-, 4-, 5- and 6-inch sizes.

The original **U-Flow® Seal** is a mechanical compression seal that prevents damage from water back-up. U-Flow Seals exceed the ANSI/SPRI RD-1 standard and have a tough nylon flange, stainless steel screws and a durable EPDM rubber gasket. Available in 3-, 4-, 5- and 6-inch sizes.

The **RAC Deluxe RetroDrain** is constructed of aluminum and stainless steel for durability, and features the patented RAC surface-activated mechanical compression seal to prevent damage from water back-up. Compatible with PVC and cast iron leader pipes, the RAC Deluxe features an extra large flange

for membrane attachment, a recessed metal clamping ring and oversized strainer to minimize damming. RAC Deluxe drains exceed the ANSI/SPRI RD-1 standard and are available in 3-, 4-, 5- and 6-inch sizes.

The universal **QuadFlash** provides a fast and efficient method for sealing single, or clusters of, rooftop pipe penetrations. QuadFlash can handle up to four pipes ranging in size from 3/8- to 2-inches in diameter, and will not crack as pipes expand and contract. QuadFlash is maintenance-free and available with black and white EPDM caps.

The **OlyVent** is engineered to prolong the life of the roof system by allowing trapped moisture and air to escape. OlyVents are available as either one-way vents or two-way breathers, and feature a flared base for improved airflow.

superior performance

RhinoBond® is a revolutionary insulation and membrane attachment system for installing TPO and PVC, and provides higher wind ratings with 25–50% fewer fasteners.

The system uses one fastener and plate to secure the insulation and the membrane without penetrating the roof cover. There are no seam fasteners and since the fastening points are spread across the roof in a grid pattern, the uplift load is more evenly distributed. It provides higher wind ratings and virtually eliminates rooftop flutter.

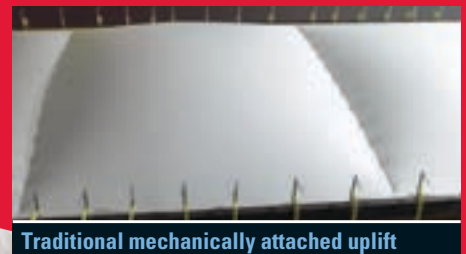

In addition to providing superior wind uplift performance, RhinoBond does not require half sheets so there are fewer rooftop seams. Based on patented electromagnetic welding technology, RhinoBond is easy to use and approved by Factory Mutual as well as by most roofing system manufacturers.

RhinoBond spreads wind load across the roof

Fasten the membrane without penetrating it!

Traditional mechanically attached uplift

hassle-free repairs *Professional grade roof repair tape*

Whenever you have a roof leak or repair to deal with, **EverSeal™** brand of roof repair tape is the ideal choice. It's fast, watertight and designed for use on most roof surfaces. EverSeal features OMG's exclusive Advanced Synthetic Adhesive Polymer (ASAP) technology that bonds to most common roofing surfaces including: EPDM, TPO, aged PVC, HYPALON®/CSPE, modified bitumen, smooth BUR, metal and more!

- OMG's exclusive **Ready-to-Roll™ dispenser box** packaging makes installation easy and hassle-free. It's convenient for product handling and storage, too.
- EverSeal is **available in 6-inch x 50-foot lengths** and comes in both black and white.
- **Synthetic polymer adhesive** – non-asphaltic formulation for maximum compatibility.
- **No primers needed** – faster installation without waiting for primers to flash.
- **Hassle-free EZ-Release Liner™** – No frustration when peeling the liner from the adhesive.
- **Chemical & UV resistant** – For superb long-term performance.
- **Wide installation temperature range** – Can be used year-round.
- **Available individually or in 4-pack master boxes** – For easy handling and storage.

EverSeal will adhere to most construction materials and can also be used to repair gutters, edge metal as well as flash skylights and penetrations. Great for RV roofs, tents and awnings, too!

productivity

By leading the commercial roofing industry in emerging technologies that promote ergonomics, efficiency and excellence, OMG is helping roofers to work faster, safer and with better results.

AccuTrac

Interchangeable drive shaft fits both AccuSeam and AccuTrac

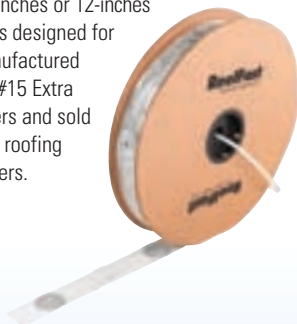

AccuSeam

AccuTrac® and **AccuSeam** are automated attachment systems providing the lowest installed cost for mechanical insulation and membrane attachment. In one step, the tool positions the plate as the roof mechanic drives the fastener, doing the job of two, reducing labor and increasing productivity. In addition, the easy-to-use AccuTrac and AccuSeam tools are ergonomically designed to minimize bending and reduce worker fatigue.

ReelFast™ provides contractors with a hassle-free method of properly spacing membrane plates. Each reel contains 500 2½-inch EyeHook® Plates, spaced at either 6-inches or 12-inches on center. ReelFast is designed for use with OMG-manufactured #14 Heavy Duty or #15 Extra Heavy Duty fasteners and sold exclusively through roofing system manufacturers.

OMG's high performance **Polymer Batten Bar** is designed for attaching single-ply membranes to steel, wood and structural concrete roof decks. Packaged in 250-foot coils, the Polymer Batten Bar is pre-punched 3-inches on center and supplied in a "pizza" style box for easy handling on the roof.

Save labor and improve productivity with the **Tall Boy**®. The Tall Boy is a lightweight tool designed to install standard or heavy duty OMG ASAP fasteners with either 2- or 3-inch plates. Tall Boy tools are 30-inches long, include a variable speed screw gun and are easily adjustable to prevent overdriving fasteners.

adhesives

*OlyBond – The most trusted name
in adhesive insulation attachment*

OlyBond® Insulation Adhesives are easy to use, hassle-free and designed to get you off the roof and onto the next job quickly. OlyBond adhesives are approved for use on most roof decks and with all common insulation types. Whether you have 10 squares or 10,000, there's an OlyBond adhesive that's right for your next project.

OlyBond500® is the premiere insulation adhesive for low-slope roofing applications. The fast-acting, dual-component, low-rise polyurethane foam adhesive is odor and noise-free, and offers the lowest installed cost method of insulation attachment. Factory Mutual, Underwriters Laboratories, Florida Building Code and Miami Dade approved.

OlyBond500 Green is the perfect insulation adhesive for LEED and sustainable projects. A low VOC, plant-based formula, OlyBond500 Green packs the same performance punch as the original OlyBond500. Factory Mutual, Florida Building Code and Miami Dade approved.

OlyBond Classic is a spray-applied, dual component adhesive used to fully adhere a wide variety of board stocks to most roofing substrates in both new and reroofing applications.

application tools

OMG offers several easy-to-use tools for applying OlyBond500 Insulation Adhesives:

PaceCart 2® is the exclusive applicator for dispensing OlyBond500. Capable of dispensing enough OlyBond500 to apply 60 squares of insulation per hour, this tool is the fastest, lowest-cost system available. The patent-pending PaceCart 2 features a clean, air-tight delivery system for Bag-in-Box technology.

The **Cordless Power Applicator** provides constant pressure for even, uninterrupted, adhesive flow and maximum efficiency. The Power Applicator significantly increases production when compared to hand applicators, and comes with two batteries and a charger.

Rest easy with **NightShot™** temporary water-tight tie-in. OlyBond NightShot forms a temporary seal between new single-ply roof covers and existing asphalt roof covers. NightShot comes in 1,500 ml cartridge sets and is compatible with new EPDM, TPO and PVC materials.

fasteners

OMG Roofing Products has the industry's widest assortment of specialty roof fasteners and plates for virtually every roofing application.

Standard Roofing Fastener

1½"–8" lengths
#3 Phillips or ¼ hex head
S W deck types

Heavy Duty Roofing Fastener

1¼"–24" lengths; #3 Phillips head
S W SC deck types

Extra Heavy Duty Fastener

2"–16" lengths; #3 Phillips head
S W AL deck types

Purlin Fastener

3¾"–8" lengths; ¼ hex head
P deck type

HeadLok®

2½"–18" lengths
Oversized head; Spider Drive™
S W SC deck types

CD-10

2"–12" lengths; flat top pan head
Diamond guide point
SC deck type

Lite-Deck Fastener

2½"–12" lengths
#3 square drive flat head
G CWF deck types

Polymer GypTec™

2½"–12" lengths
¼" square drive
G CWF deck types

Masonry Anchor

¾"–2" lengths
¾"–¼" diameters
Zinc plated pin
CMU M SC substrates

Steel Plate

2" and 3" diameters available

Plastic Locking Plate

2" and 3" diameters available

AccuTrac® Plate

For use with AccuTrac tool
3" square steel insulation plate,
flat or recessed

GypTec Plate

2" and 3" diameter plates
available

RhinoBond® Plates

For PVC and TPO membranes
3" diameter

key

S Steel
W Wood
G Gypsum
M Masonry

P Purlins
AL Aluminum
SC Structural Concrete
LC Lightweight Concrete

LWIC Lightweight Insulating Concrete
CMU Concrete Masonry Unit
CWF Cementitious Wood Fiber

OlyLok Locking Impact Nail

1.4", 1.8", 2.8", 3.8" and 4.8" tube lengths with 2.7" plate
LWC G CWF deck types

Base Sheet Fastener

1.2" and 1.75" lengths
Available assembled with 2.75" plate
LWC G deck types *Restrictions apply.

ASAP® (Assembled Screw And Plate)

2¼"-8" lengths; Standard or Heavy Duty Fasteners
Steel or Locking Plastic Plates
S W deck types

Flat Bar

1" wide, .090 thick
Punched 6", 8", or 12" o.c.
Terminates single-ply membrane at parapet walls

Lip Bar

¾" wide, ⅜" lip, .090 thick
Punched 6", 8", or 12" o.c.
Terminates single-ply membrane at parapet walls

Lite-Deck Batten Bar

18 ga. thick
Punched 6" or 12" o.c.
LC G CWF deck types

Polymer Batten Bar

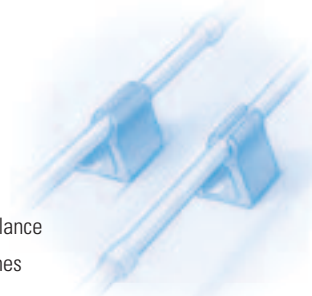

¾"-1" wide
Punched 3" o.c.
S W SC deck types

pipe supports

PipeGuard is the roofing industry's preferred method for supporting small rooftop pipes. Made of durable EPDM rubber, OMG PipeGuard is a better alternative to wood blocks.

- Supports steel and PVC pipe, conduit and copper tubing
- Ideal for electrical, solar, gas, HVAC, etc.
- EPDM rubber bases prevent damage to roof membranes
- Triangle shape sheds water
- Will not deteriorate from water or sunlight exposure
- Wide platform base provides stability and balance
- Available in seven sizes for pipes up to 6 inches in diameter and heights up to 10 inches
- Strut Model and Height Adjustable Strut supports multiple pipes*
- Ask about custom capabilities

*Uses standard strut clamps, sold separately.

Nothing is easier, as effective, economical or versatile.
