OlyFlow Drains

OMG offers the broadest line of insert drains in the industry, all designed to provide a secure, watertight connection to the existing plumbing drain leader. Durable and highly reliable, OMG's line of OlyFlow Drains exceed industry standards and are engineered for easy installation from the rooftop without disturbing building occupants. When your job calls for drain work, call for an OlyFlow Drain from OMG Roofing Products.

- ✓ Up to 4x faster than rework or subbing
- ✓ No subcontractor liability issues
- ✓ Up to 50% lower material and labor costs
- ✓ Your schedule, not a plumber's

ANSI/SPRI RD-1

ANSI/SPRI RD-1 is a national performance standard for retrofit roof drains. While most retrofit roof drains are not tested to this standard, OlyFlow Insert Drains, U-Flow Seals and RAC Drains all exceed the ANSI/SPRI RD-1 standard.

INSTALL BETTER ROOFS. IMPROVE YOUR BOTTOM LINE.

Whether your roofing job calls for insert or new connection drains, OMG Roofing Products' line of OlyFlow® Roof Drains helps you do the job right, fast and profitably.

In 15 to 30 minutes the entire installation can be completed from the rooftop. Without reworking broken or rusty drains. Without disturbing building occupants. Without plumbers and subcontractors that interrupt your schedule and take your profits.

THE ORIGINAL U-FLOW® SEAL

When it comes to insert drains, the seal is the deal. What good is an insert drain with a questionable connection to the existing drain leader? Don't risk your project with inferior seal technologies or unproven products. OMG's U-Flow Seal has been around since the mid 1980s, long before any other mechanical seal on the market, and exceeds the ANSI/SPRI RD-1 standard of holding a ten-foot column of water for 24 hours. Which means that when properly installed, U-Flow Seals provide a watertight connection that prevents damage to the building from water backup.

- Available in 3-, 4-, 5- and 6-inch sizes
- Fast and easy to install from the rooftop
- Compatible with all PVC and cast iron drain leaders
- Exceeds ANSI/SPRI RD-1 standard

Faster & easier than rework!

SEAL EXPANSION CAPACITY

U-Flow Mechanical Seal

SIZE	O.D. OF PRE-EXPANDED SEAL	FIT INTO MIN. PIPE I.D.	FULLY EXPANDED
3"	2.86"	2.88"	3.40"
4"	3.74"	3.76"	4.40"
5"	4.73"	4.75"	5.40"
6"	5.75"	5.77"	6.40"

RAC Backflow Compression Seal

SIZE	O.D. OF PRE-EXPANDED SEAL	FIT INTO MIN. PIPE I.D.	FULLY EXPANDED
3"	2.75"	2.77"	3.12"
3.5"	3.31"	3.33"	3.60"
4"	3.85"	3.87"	4.20"
4.5"	4.35"	4.37"	4.69"
5"	4.81"	4.83"	5.12"
5.5"	5.43"	5.45"	5.75"
6"	5.85"	5.87"	6.30"

Due to manufacturing variances and job site inconsistencies, these figures are guidelines and are not guaranteed.

O.D. = Outside Diameter I.D. = Inside Diameter

When your job calls for drain work, rely on OlyFlow Drains from OMG Roofing Products.

HERCULES® DRAIN

The industry's top selling insert drain has a one-piece spun aluminum body that features an extra-large flange for securing the roof cover as well as a depressed sump to enhance flow. Heavy duty cast aluminum clamping ring and strainer dome enhance drain durability and will not rust. U-Flow Seal technology offers a secure, watertight, mechanical connection to PVC or cast iron pipe leaders.

- Compatible with all commercial roof systems
- 3-, 4-, 5- and 6-inch diameters accommodate most field conditions
- Available with heat-weldable thermoplastic coating for direct membrane attachment
- U-Flow Seal offers a watertight connection
- 12-inch drain stem can be shortened on the job site
- Custom lengths and configurations available

RAC DELUXE DRAIN

Designed for use with single-ply, BUR and modified bitumen roofing systems, the RAC Deluxe Drain is made of durable aluminum and stainless steel and features an extra-large flange for securing the roof cover. The patented mechanical RAC Backflow Compression Seal installs in minutes and is fully compatible with PVC and cast iron leader pipes.

- Low profile design minimizes damming
- 3-, 4-, 5- and 6-inch diameters accommodate most field conditions
- Available with heat-weldable thermoplastic coating for direct membrane attachment
- Custom lengths and configurations available

SCUPPER DRAIN

When it comes to through-wall, side wall or scupper drainage pipes, nothing is as easy or as versatile as OMG's Scupper Drain. Made of durable aluminum and stainless steel, Scupper Drains feature the RAC Backflow Compression Seal, and horizontal and vertical clamping assembly.

- Compatible with all common commercial roofing systems
- 3-, 4-, 5- and 6-inch sizes
- Custom lengths and configurations available

New Connection Drains

When the project requires a new drain or you have a ponded roof application with no drain nearby, call for a new connection drain. OMG Roofing Products offers a complete line of options.

Choose between the Aluminum Classic or NewCon Drain. Both are designed for use in new connection applications or where new drains are necessary to eliminate ponding water. Both drains are compatible with single-ply, BUR and modified bitumen roofing systems and both feature an aluminum body with a depressed sump for improved drainage. A reliable rubber no-hub coupler with stainless steel bands connects quickly to PVC or cast-iron drain pipes below the deck.

- Available in 3- through 6-inch sizes
- Custom sizes available
- Under deck clamp not required

NON-STANDARD APPLICATIONS

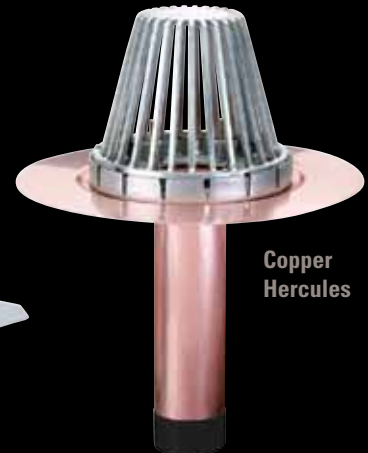

CUSTOM DRAINS

Custom drain design and fabrication is an OMG specialty. If you are working with unusual dimensions, angles or shapes, call us. We can manufacture a drain that meets your specifications in any quantity. Call OMG Customer Service at 800-633-3800.

COPPER HERCULES DRAIN

Have an application in a highly corrosive environment? The Copper Hercules is the answer. Made from heavy copper, the Copper Hercules can withstand some of the most corrosive environments such as the coastal areas of North America. Complete with an extra-large flange, a depressed sump, heavy duty cast aluminum clamping ring and strainer dome. In addition, the Copper Hercules features U-Flow Seal technology to ensure a secure, watertight, mechanical connection to PVC or cast iron pipe leaders.

- Exceeds ANSI/SPRI RD-1 standard
- Custom lengths and configurations available

NATIONWIDE CUSTOMER SUPPORT

When it comes to service, **OMG Roofing Products** has a nationwide network of field sales representatives available to help. We're there when you need us for product demonstrations, training, job starts and more. Let our local sales representative help with your next project.

For more information or an on-site OlyFlow Drain demonstration, please call 800-633-3800.

More Money-Making Products

PIPEGUARD

OMG's line of PipeGuard Pipe Supports is an economical method for supporting small rooftop pipes including solar, HVAC and electrical lines. Made of EPDM and HDPE, bases will not deteriorate like wood blocks or damage roof covers. And there is a PipeGuard that is compatible with every roof cover.

- Seven sizes, for pipes from ½-in. to 6-in. in diameter
- Heights from 1½-in to 10-in.
- Compatible with all major roofing materials
- Some sizes and configurations available in Safety Yellow
- Custom sizes available

GUTTER RETRODRAIN

The Gutter Drain installs easily within 9-inch wide box-type gutters, near parapet walls or in other tight spaces. The Gutter Drain features durable aluminum and stainless steel construction and patented RAC Backflow Compression Seal.

- Available in 3- and 4-inch sizes
- Custom sizes available

OLYVENT

Trapped moisture can damage the roof deck. OlyVent is engineered to prolong the life of the roof system by reducing moisture within the roof assembly. Rugged spun aluminum construction.

- Available as a one-way vent or two-way breather
