OMG Roofing Products Debuts Fastener for Metal Roof Retrofits

Agawam, Mass., September, 2011 – OMG Roofing Products has a new fastener for use in metal roof retrofit applications. The new RetroDriller Fastener features a unique drill point designed to quickly cut through metal roof decks and into structural purlins up to 3/16-inches. The FM-approved fastener is compatible with OMG's TPO and PVC RhinoBond Plates and available in 4-, 5-, 6-, 8-, and 10-inch lengths.

Each fastener has three full inches of thread, a #3 square drive and ultra sharp 1/2" drill point that makes installation fast and easy. In addition, they are coated with OMG's exclusive CR-10 corrosion-resistant coating which exceeds the FM Approval Standard 4470 for red-rust after 30 Kesternich cycles. Four, 5- and 6-inch lengths are also compatible with OMG's RhinoTrac stand-up installation tool that provides a more productive and healthier method for installing plates and screws on metal roofs.

The OMG RetroDriller is the ideal choice for securing thermoplastic single-ply roofing membrane to structural purlins in standing seam metal roof applications. For

more information or questions regarding the RetroDriller, contact your local OMG sales representative, call OMG customer service at (800) 633-3800 or visit, www.olyfast.com/product-details/product/retrodriller-fastener.html.
