New Safety Yellow PipeGuard Available from OMG

Agawam, Mass., November, 2011 – OMG Roofing Products has introduced a new product to its growing family of pipe supports – the Safety Yellow PipeGuard. Made from 100% recycled HDPE (High Density Polyethylene), Safety Yellow PipeGuard is compatible with all common roof covers, including PVC, and clearly identifies potential rooftop trip hazards.

Safety Yellow PipeGuard units are designed to support small rooftop pipes, tubing and conduit from ½-inch to 6-inches in diameter and at heights from 4- to 10-inches above the roof surface. Each pipe support has a 10-inch wide base designed to shed water and add strength and stability for superior load capacity.

“We listened to the market and Safety Yellow PipeGuard has many important attributes that the industry demands. It saves hours of labor, helps prevent trip hazards, and it’s made from recycled materials. It can also be used on all types of roof covers,” said Dan Genovese, OlyFlow product manager for OMG Roofing Products.

The new Safety Yellow PipeGuard is available in a strut model as well as a height adjustable strut model. For additional product details, call OMG at (800) 633-3800 or visit our website at <http://www.olyfast.com/pipe-supports-and-flashings.html>.
